

STEM CELLS

Terms	Definition
Bipotent	
ES cells	
Multipotent	
Pluripotent	
Potency	
Progenitor	
Self renewing	
Stem cells	
Totipotent	
Unipotent	
Bone marrow transplant	
Cell lines	

Cell surface markers	
Cellular Potency	
Chromatin	
Clone	
Direct isolation of stem cells	
DNA methylation	
Enucleate egg	
Epigenetic regulation	
FACS	
Hematopoietic system	
Histone	
ICM	
iPS cells	

Niche	
Nuclear potency	
Nucleosomes	
Pulse chase experiment	
Repopulation assay	
Reproductive cloning	
SCNT	
Therapeutic cloning
