

## **Paper Reading Questions**

For each paper, your assignment is two-fold. By 10PM the evening before lecture:

- Submit your answer for each lecture's paper question via the submission web site in a file named `lecn.txt`, and
- Submit your own question about the paper (e.g., what you find most confusing about the paper or the paper's general context/problem) in a file named `sqn.txt`. You cannot use the question below. To the extent possible, during lecture we will try to answer questions submitted the evening before.

## **Lecture 18**

For the different parts of the browser state shown in Tables 1-3, what are the security implications of a "yes"? Consider both of the two threat models that the authors put forward for private browsing.
